Injectables

We listen to your concerns, evaluate your aesthetic needs, and then recommend a custom treatment plan that is unique to you because we do not believe that one size fits all.

Neurotoxin

The classic! FDA approved for treatment of the frown lines and crow's feet, it can reduce a tired or angry expression and smooth those pesky wrinkles. It can be utilized off label in other areas to relax muscles to improve the jawline, neck bands, and even the "peau d'orange" chin.

Injectable Fillers

Dermal fillers help to diminish facial lines and restore volume and fullness in the face. These can be used to plump thin lips, enhance hollow contours, soften facial creases and wrinkles, and improve the appearance of recessed scars. Dermal fillers can be very helpful in those with early signs of aging, or as a value-added part of facial rejuvenation surgery.

Kybella Double Chin Treatment

The newest! Kybella dissolves fat in the dreaded "double chin" area. The fat is permanently gone, but it may take typically 2 to 4 treatments or more to reach full correction. It can be like chin liposuction without surgery for the right person. And "Kybella is also for the fellas" is one of our more popular treatments with men.

Platelet Rich Plasma (so called "Vampire Procedures")

The cutting edge! Platelet Rich Plasma, or as we like to call it, "liquid gold," is extracted from other blood cells. Highly concentrated with growth factors, it has been used for multiple treatments such as the "vampire procedures," hair growth, and our exclusive skin boosters.

Skin Boosters

The innovative! We are the first and only plastic surgery practice in Atlanta to provide the latest technology for the skin. Using a delivery device thinner than a human hair, our exclusive skin boosters can help reduce pore size and increase skin hydration for a dewy, luminous complexion. Try a skin booster with Platelet Rich Plasma for a "mini-Vampire facial" or our exclusive BabyTox™ and AquaGlow™. Everyone will say "There she glows!"
