

AGE Beautifully

by Elizabeth Whitaker M.D., F.A.C.S.

Non-Invasive Aesthetic Treatments

Our facial treatment services are designed as a foundation for healthy younger skin from the cellular level. Our beauty team has one goal: to make you GLOW.

Microneedling Growth Factor Facial Treatment

Designed to give you plump glowing skin as you regenerate your own collagen. Your own protein rich plasma (PRP) or growth factors are introduced into the skin. Your skin will look and act like young skin again. There she glows!

Skin Boosters: BabyTox™ & AquaGlow™

Exclusive to Atlanta Face & Body, skin boosters are directly infused with microneedles thinner than human hair. Sweat/sebaceous glands shrink, visibly reducing pore size and acne. Skin is moisturized from the inside out, filling out lines and wrinkles. Results in a beautiful luminous glow and healthy vibrant skin.

Signature Stimulation Peel: Perfect For Any Skin Type

This medium strength chemical peel is designed to provide long lasting benefits. It improves acne, melasma, sun damage, fine lines, skin texture, enlarged pores and dullness while reducing inflammation.

Fractional Laser (Non-Ablative)

Lasers work below the surface to perfect skin by delivering heat and stimulating collagen formation. This transformative treatment improves acne scars, skin tone, uneven texture and enlarged pores, even stubborn stretch marks.

Photofacial

This light based treatment gives you bright, even toned skin and a clearer complexion. Helps reduce redness, pigmentation and sun damage.

AFAB- 5 DAYS TO FABULOUS SKIN

Our signature non-invasive package combines our 3 most popular treatments. Photofacial for pigment/redness correction, Fractional Laser for texture, and a Babytox™/AquaGlow™ for smaller pores and hydration. Results are FABulous!

Radiofrequency Skin Tightening

Radiofrequency energy stimulates collagen and elastin to tighten skin and soften wrinkles. Great for crepey skin on arms and knees, or for a nonsurgical tummy tuck.

Ultherapy: NonSurgical "Face Lift"

The ONLY technology FDA-cleared to lift the neck, chin and brows. Ultrasound energy targets the deeper support layer of the face that leads to sagging as well as stimulating collagen/elastin in the skin. Improves lines/wrinkles on the chest and décolletage. Results from one time treatment can last 1-2 years.
